

BE KIND, BE #ELMKIND

We are on a mission to eliminate single use plastic bottles within the cleaning product market. So invest in a sustainable aluminium bottle today and refill, reuse and reduce tomorrow.

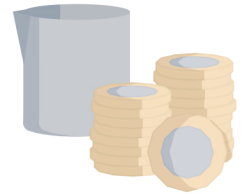

STEP 1

Invest in a sustainable, refillable aluminium bottle mixed and ready to use

STEP 2

Save money by purchasing a highly concentrated refill bottle

STEP 3

Fill up your empty bottle with 1 part concentrate to 4 parts water (eg 100ml concentrate + 400ml water)

STEP 4

Once empty, top up on concentrate from your local elmkind refill station to save even more money, continue to reduce materials and help the planet
